

UMass Dartmouth Dormitories

Dartmouth, Massachusetts

Pine Dale Hall and Oak Glen Hall are two four story student dormitory buildings that provide residence to 820 students. The construction of these dormitories used Strescore planks supported on concrete block bearing walls. Strescon Limited supplied and installed some 2336 pieces of 8" thick plank covering 160,000 sq. ft. of floor and roof area.

The inherent fire resistant and sound proofing characteristics of the plank provide the students with a safe and secure place to live and study.
