

UPEI Student Residence

Charlottetown, Prince Edward Island

*Focus on
Precast Concrete Solutions*

UPEI Student Residence This new Dormitory at the University of Prince Edward Island was opened to students for the winter 2006 semester. Five stories high with a gross floor area of 86,500 sq. ft., the dormitory contains 67 double suites, 9 single suites and 5 triple suites. As the architect and structural engineer had used Strescore plank previously on a science laboratory building they chose masonry and Strescore as the framing system for this state of the art facility. The dormitory is directly connected to a large dining hall so the sound and fire safety qualities of Strescore plank made it the product of choice.

Project: **UPEI Student Residence - Charlottetown, Prince Edward Island**
