

*Precast Concrete Solutions for Nursing Homes*

# Wingate at Needham

*Needham, Massachusetts*

This skilled nursing home, operated by Wingate Healthcare, was constructed in 1995 to provide both long term care and short term rehab.

The two story building used 65,000 square feet of 8" thick Strescon plank to form the second floor and roof. The ceilings were painted with an acoustical white paint to provide a bright and spacious look for the residents.
